China offer to serve as Secretariat for the new sensor networks working group.

Dear Mrs. Lisa Rajchel,

During the study period of SGSN, the importance of sensor networks has been explored and discussed by many experts. On the 4th SGSN meeting in Oslo, SGSN approved a resolution of SGSN long term role. Based on the decision made on Oslo meeting, SGSN will recommend to JTC1 a working group, subject to approval of appropriate work items. China believes the recommendation is worthy of being considered by National Bodies and JTC1.

As one of the main participants in SGSN, Chinese experts made a lot of contributions to the Technical Document on Sensor Networks along with other experts from the world. If the recommendation could be approved on JTC1 plenary meeting, China would like to offer to serve as Secretariat for the new sensor networks working group.

Thank you for your consideration.

Best regards,

ZHANG Lin
