UK National Body Contribution on Withdrawal of International Standardized Profiles

Withdrawal of ISO/IEC ISP 10615-6:1998

JTC 1 National Bodies were asked, in N 9260, to review ISO/IEC ISP 10615-6:1998 (Information technology – International Standardized Profiles ADInn -- OSI Directory -- Part 6: ADI32 -- DSA Support for Distributed Operations) and to submit any recommendations regarding its systematic review by 5 December 2008.

JTC 1 has already approved the withdrawal of this standard in N 8990 and the UK National Body considers that it is inappropriate to submit this standard for systematic review. The relevant information is documented in the annex to this contribution.

Withdrawal of ISPs listed in N 8884

ISO/IEC ISP 10615-6 was one of a list of ISPs proposed for withdrawal in N 8804 (JTC 1 resolutions from the JTC 1 plenary meeting in Australia, October 2007) and N 8884 (Ballot on withdrawal of these ISPs) and these ISPs were approved for withdrawal in N 8990 (Summary of voting on the withdrawal ballot).

The online ISO Catalogue indicates that none of the ISPs listed in N 8884 are recorded as reaching stage 90.99, Withdrawal of International Standard proposed by TC or SC. The UK National Body requests the JTC 1 Secretariat to consult with ITTF to investigate the apparent lack of progression towards the withdrawal of these standards.

No action is required on the withdrawal of ISO/IEC ISP 10607-1 to -6 as these ISPs were withdrawn in 1995 and were included in the list in error.

Retention of ISO/IEC ISP 11188-1:1995

In addition, the UK National Body requests that ISO/IEC ISP 11188-1:1995, which was also listed in the above documents, should not be withdrawn as it is still referenced by a current standard, as indicated in resolution 6.0.5 of the SC 6 plenary resolutions in ISO/IEC JTC 1/SC 6 N 13602.

Annex. Documentation relating to withdrawal of ISPs

JTC 1 documents

N 8754	2007-09-10	UK Proposal for Withdrawal of International Standardized Profiles that are the Direct Responsibility of JTC 1	This document is circulated to JTC 1 National Bodies for review and consideration at the October 2007 JTC 1 Plenary meeting in Australia.
N 8804	2007-10-16	Resolutions Adopted at the 22nd Meeting of ISO/IEC JTC 1 8-13 October 2007 in Australia	<u>Resolution 39 - Withdrawal of International Standardized Profiles that are the Direct Responsibility of JTC 1:</u> JTC 1 instructs the Secretariat to issue a 60-day default ballot on approval of the withdrawal of the International Standardized Profiles listed in document JTC 1 N 8754. This ballot shall include specific instructions on the nature of the 60-day default letter ballot process. These instructions will indicate that failure of a National Body to notify the Secretariat, within the 60-day period, of the need to retain specific items referenced in JTC 1 N 8754, will result in all items being withdrawn.
N 8884	2008-01-04	Proposed Withdrawal of International Standardized Profiles that are the Direct Responsibility of JTC 1	This document is circulated to JTC 1 National Bodies for a 60 day letter ballot. This document previously failed a 60 day default ballot as JTC001-N- 8821. The objection to the JTC001-N-8821 default ballot has been annexed with this document. Please submit your vote via the online balloting system by the due date indicated. Due date: 2008-03-04
N 8990	2008-03-18	Summary of Voting/Table of Replies for JTC001-N-8884 60 day letter ballot on Proposed Withdrawal of International Standardized Profiles that are the Direct Responsibility of JTC 1	This document is circulated to JTC 1 National Bodies for information. Based on the results of this ballot, this Proposed Withdrawal of International Standardized Profiles that are the Direct Responsibility of JTC 1 has been approved.

JTC 1/SC 6 Document

N 13602	2008-04-21	Resolutions of ISO/IEC JTC 1/SC 6 Plenary Meeting 11 April 2008 Geneva, Switzerland	<u>Resolution 6.0.5 Proposal for Stabilization of MHS Standards and profiles</u> SC 6 further requests the JTC 1 Secretariat not to withdraw the following ISP as it is referenced by ISO/IEC ISP 10611-2:1997: ISO/ISP 11188-1:1995, Common upper layer requirements. Basic connection oriented requirements
