**Comments:**

- **Austria:** no expertise available
- **France:** Considering the received information, France doesn't understand the way this liaison can be a benefit for ISO/PC 246. France would be happy to move its vote into positive if further information is received.
- **Switzerland:**

CH1	Ge	Liaison should be done with Track&Trace or customer adhesion programs instead of AC tool.  We fully support standardization effort in the telecommunication area. However standardization is not wished regarding anti-counterfeiting tool as it's intrinsiquely reduce the security.
CH2	Ge	We feel that they are not concentrated on verification or anti-counterfeiting tools but only on serialization and track and trace only.
