**Request for extension of ISO limit dates for projects ISO/IEC 29128
ISO/IEC 27033-2 and ISO/IEC 27033-4**

As a result of their recent November 2009 meetings held in Redmond (WA, USA) SC 27 Working Groups 3 and 4 request that JTC 1 approve the following extensions to ISO limit dates and that ITTF update their database accordingly:

WG 3

Project	ISO/IEC number	Title	Current limit dates		New limit dates	
1.27.60	29128	Verification of cryptographic protocols	FCD	2009-11	FCD	2010-11
			FDIS	2010-11	FDIS	2011-05
			IS	2011-05	IS	2011-11

Rationale:

As per SC 27 May 2007 Plenary resolution 32 (see N5939) Project 29128 was taken up by SC 27. During the work it turned out, that more general questions of verification of cryptographic protocols need to be addressed in order to achieve a proper technical focus and a consensus worldwide. These aspects could not be worked on during the estimated default timeframe and caused some delay in the development process. However, as a result of the recently November 2009 WG 3 meeting a significant progress has been reached while critical aspects of the security evaluation could be resolved and new limit dates as presented above have been approved.

Miguel Bañón
WG 3 Convenor

WG 4

Project	ISO/IEC number	Title	Current limit dates		New limit dates	
1.27.58.02	27033-2 (revision of ISO/IEC 18028-2: 2006)	Network Security – Part 2: Guidelines for the design and implementation of network security	FCD	2010-05	FCD	2010-11
			FDIS	2010-11	FDIS	2011-05
			IS	2011-05	IS	2011-11

During the work it turned out that more general questions of the design and implementation of network security need to be addressed. This, in addition to the change of project editor due to the retirement of previous editor, had a major impact to the progress of the project as planned. It was resolved to proceed the standard to the 1st Committee Draft at the 8th WG4 Plenary meeting at Redmond, US, in Nov, 2009 (ref. Resolution 3 of the SC 27 WG 4 Redmond Resolution – SC 27N7908). The work on this project will be expedited from now on to meet the new target dates as presented above.

WG 4

Project	ISO/IEC number	Title	Current limit dates		New limit dates	
1.27.58.04	27033-4 (revision of ISO/IEC 18028-3: 2005)	Network Security – Part 4: Securing communications between networks using security gateways – Threats, design techniques and control issues	CD	2010-05	CD	2010-11
			FCD	2010-05	FCD	2011-11
			FDIS	2010-11	FDIS	2012-05
			IS	2011-05	IS	2012-11

27033 is a multi-part standard and hence requires a handful of editors to take up the different parts. Although the whole 27033 project started in May 2006, the project editor for part 4 was not found until May 2009. Thus it took a longer time to advance this project than planned. It was resolved to proceed the standard to the 1st Working Draft at the 8th WG4 Plenary meeting at Redmond, US, in Nov, 2009 (ref. Resolution 2 of the SC 27/WG 4 Redmond Resolutions – SC 27N7908). The work on this project will be expedited from now on to meet the new target dates as presented above.

Meng Chow Kang
WG 4 Convenor

Project Status of ISO/IEC 29101 (November 2009)

Current status:		ISO/IEC 5th WD 29101	
Title: Privacy reference architecture			
Project number: 29101 (1.27.55)			
Reference document:		ISO/IEC JTC 1/SC 27 N8164	Date: 2010-01--25
Superseeds document:		ISO/IEC JTC 1/SC 27 N7753	Date: 2009-07-15
Explanatory Report			
Status	SC 27 Decision	Reference Documents	
		Input	Output
Study Period (SP)	Resolution 30 of 17 th SC 27 Plenary (N4599), Apr. 2005	JTC 1 Recommendation (4108=JTC1N7552) to assign responsibility to SC 27 in the area of privacy technologies	Call f. Contr. (N4616)
Study Period (SP)	Recommendation of Ad Hoc on Privacy (N4880), Nov. 2005.	SoContr (N4723)	Report of Ad Hoc Nov. 2005 (N4880)
