SC 6 Nomination of KISA as the Registration Authority for ISO/IEC 9834-9 "Information technology – Open Systems Interconnection –Procedures for the operation of OSI Registration Authorities: Registration of object identifier arcs for applications and services using tag-based identification"

Background

KISA was established by merging three organizations on July 2009; NIDA (National Internet Development Agency), KISA (Korea Information Security Agency) and KIICA (Korea IT International Cooperation Agency).

The former NIDA has managed to consolidate its areas of operation and play a leadership role in managing Korea's Internet address resources. In addition to managing Internet address resources, the former NIDA also develops new projects to promote the Internet, conducts and assists in Internet-related research, leads efforts to standardize Internet resources, conducts policy research aimed at further developing and promoting the use of Internet address resources, and cooperates with international organizations concerning Internet governance. All missions and functions of former NIDA transferred to new KISA.

KISA's english version website will be open in December 2009. For the time being, visit the former NIDA website for more information on KISA at

<http://www.nida.or.kr/english/aboutnida/index.jsp?gubun=4&menu=1>

Prior Knowledge and Experience

The former NIDA has been a key player in the development of ISO/IEC 9834-9 and developed the mobile RFID code (mcode) for Korea.

Proposal for Registration Authority (RA)

KISA will operate the RA in accordance with ISO/IEC 9834-9. Any identification scheme that is submitted for registration under the {joint-iso-itu-t(2) tag-based(27)} OID arc will be treated according to the criteria given in ISO/IEC 9834-9.

Financials

No fee will be charged.

Legal

KISA have reviewed the draft Registration Authority Agreement and are happy that it can form the basis of the Agreement with ISO and IEC.

Resulting addition to the ISO Web Page

The web page at

http://www.iso.org/iso/standards_development/technical_committees/maintenance_agencies.htm will require the addition of a new entry for ISO/IEC 9834-9 as follows:

ISO/IEC 9834-9:2008

**Information technology – Open Systems Interconnection –Procedures for the operation of
OSI Registration Authorities: Registration of object identifier arcs for applications and
services using tag-based identification**

Registration Authority

Korea Internet & Security Agency (KISA)
12F, Daedong B/D, 79-3, Garak-dong, Songpa-gu
Seoul, 138-950

Republic of Korea
