Number Not Responding: **4**

The AIAG is unable to approve this NWIP for the following reasons.

- With the exception of Section 6.5 Plastic Boxes and Section 6.6 Plastic Cardboard Boxes, all of the preceding data in this document duplicates the same data in the published JAIF RTI document.
- With VERY MINOR changes (mostly omissions in this document), this documents Section 7 is identical to the JAIF RTI documents Sections 6.0 through 6.4.
- This documents Section 8 is extremely similar to the JAIF RTIs Section 10.3.
- And similar comparisons abound.
- Section 9 of this document is new data, with nothing comparable in the JAIF RTI document.
 - ° And the data in Section 9 needs to be reviewed and commented on by the laser marking community as there are issues that need to be / can be addressed in the data presented.

SUMMATION: This NWIP would be acceptable to the AIAG if it proposed adding the above referenced differences to the already published JAIF RTI document, and submitting the JAIF RTI document as a NWIP to ANSI instead of the attached document.
