This liaison statement reproduces JCA-NID Output document [JCANID O-45](#)

The ITU [JCA-NID](#) (Joint Coordination Activity on Network Aspects of Identification Systems, including RFID) met in Jeju Island, Korea, on 23 March 2010.

During the meeting, document [Doc I-203](#), a status report of JTC 1/WG 7 on sensor networks, was presented by Sangkeun YOO. It provides a status report on ISO/IEC JTC 1 SGSN (Study Group on Sensor Network). SGSN has been closed and a new group, WG7, was established and took over some of SGSN responsibilities. The first meeting of WG7 took place in London, 8-12 March 2010. Next meeting of WG 7 will be held in NIST, Gaithersburg, Maryland, USA, 23-27 August 2010.

JCA-NID would like to draw SG13 attention on this report and especially WG 7 work programme. JCA-NID believes that WG 7 could develop a standard that would overlap with Y.2221. For more details, see JCA-NID Doc I-203 at http://ifa.itu.int/t/sftp/jcanid/1003/In/JCANID-I-203_JTC1-SGSN_Report.doc.

JCA-NID would recommend to SG 13 to share Y.2221 with JTC 1/WG7 to avoid overlap and duplications.
