

**ISO/IEC JTC 1 N 9427**  
**ISO/IEC JTC 1**  
**Information Technology**

2008-11-24

**Document Type:** Other Document(Defined)

**Document Title:** OASIS Liaison Report to JTC 1 at Plenary in Nara, Japan

**Document Source:** JTC 1 Secretariat

**Reference:**

**Document Status:** For Information

**Action ID:** For Information

**Due Date:**

**No. of Pages:** 20

# **Liaison Report to JTC1 from OASIS**

**Interoperability is essential ...  
even for Standards Organizations**

**James Bryce Clark**  
**Director, Standards**  
**Development, OASIS**

***[jamie.clark@oasis-open.org](mailto:jamie.clark@oasis-open.org)***  
***[www.oasis-open.org](http://www.oasis-open.org)***

- OASIS is a member-led, international non-profit standards consortium concentrating on global e-business
- **More than 5000 participants, representing over 600 organizations and individuals in about 100 countries**

"The largest standards group for electronic commerce on the Web"

**The New York Times**  
ON THE WEB

Total OASIS Members - 2008

■ Asia Pacific ■ Europe Africa ■ North America

- OASIS includes about 75 upper tier sponsor members with significant institutional commitments, including foundational sponsors IBM, Microsoft, Oracle, Primeton & Sun
- **Rich diversity through academic and individual membership options**

"The largest standards group for electronic commerce on the Web"

**The New York Times**  
ON THE WEB

Total OASIS Members - 2008

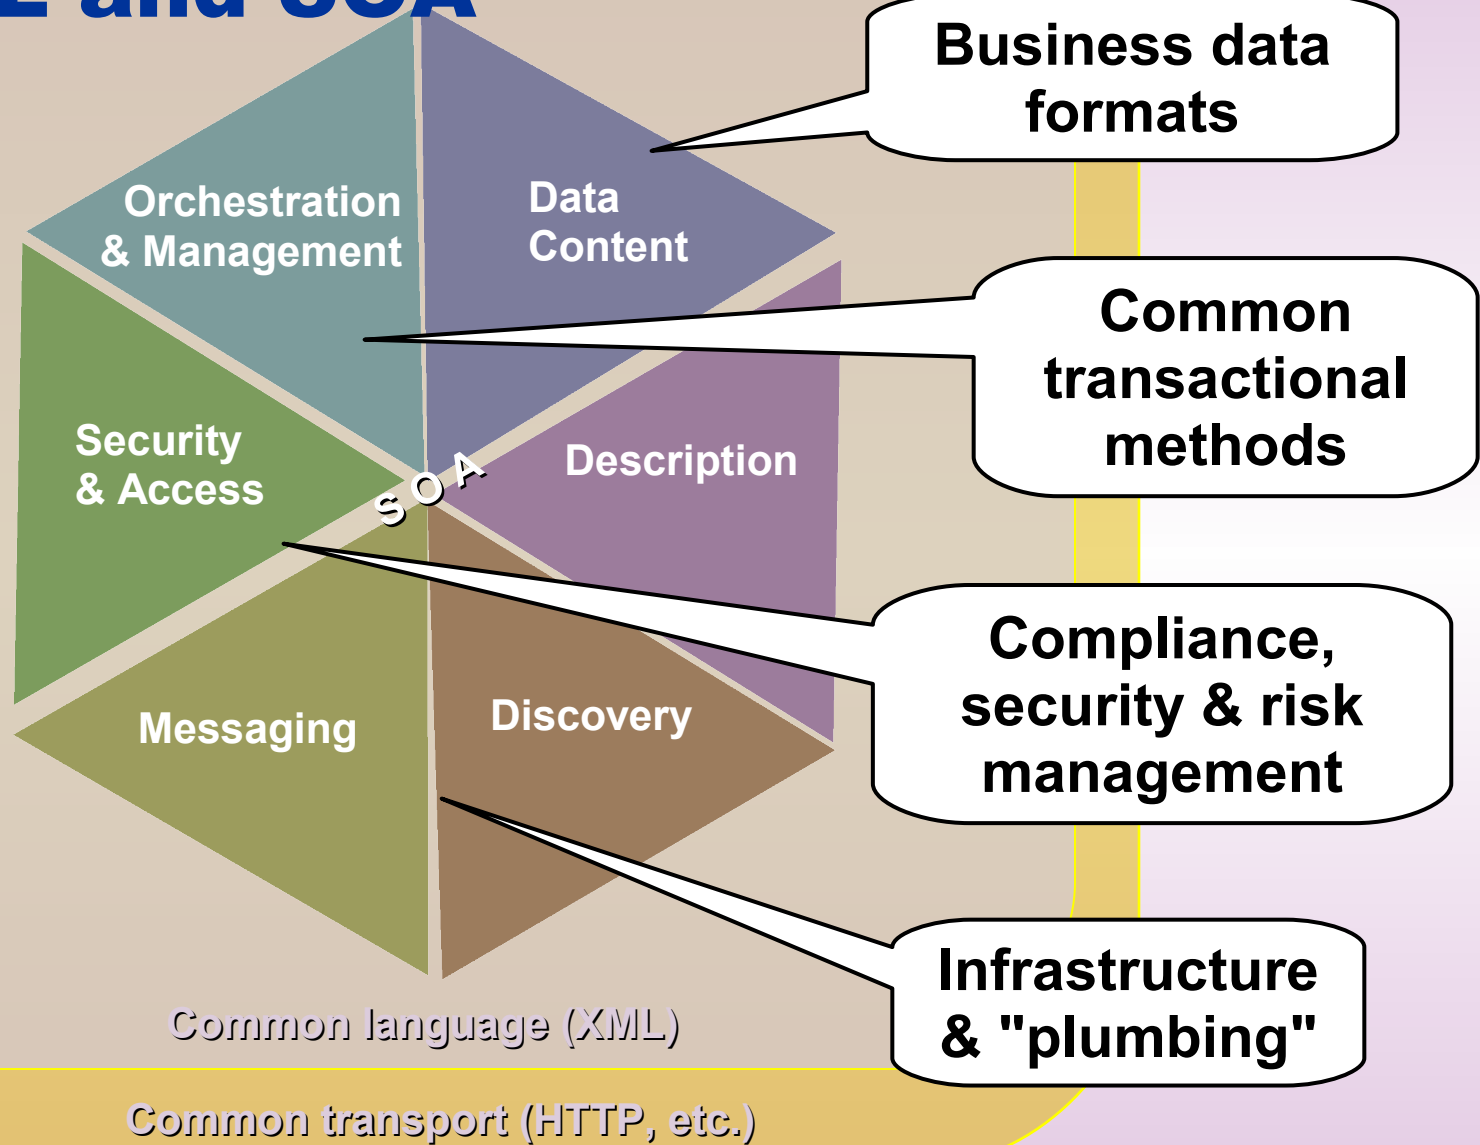

- Open, global, transparent and diverse
- About 60 technical committees producing royalty-free and RAND standards

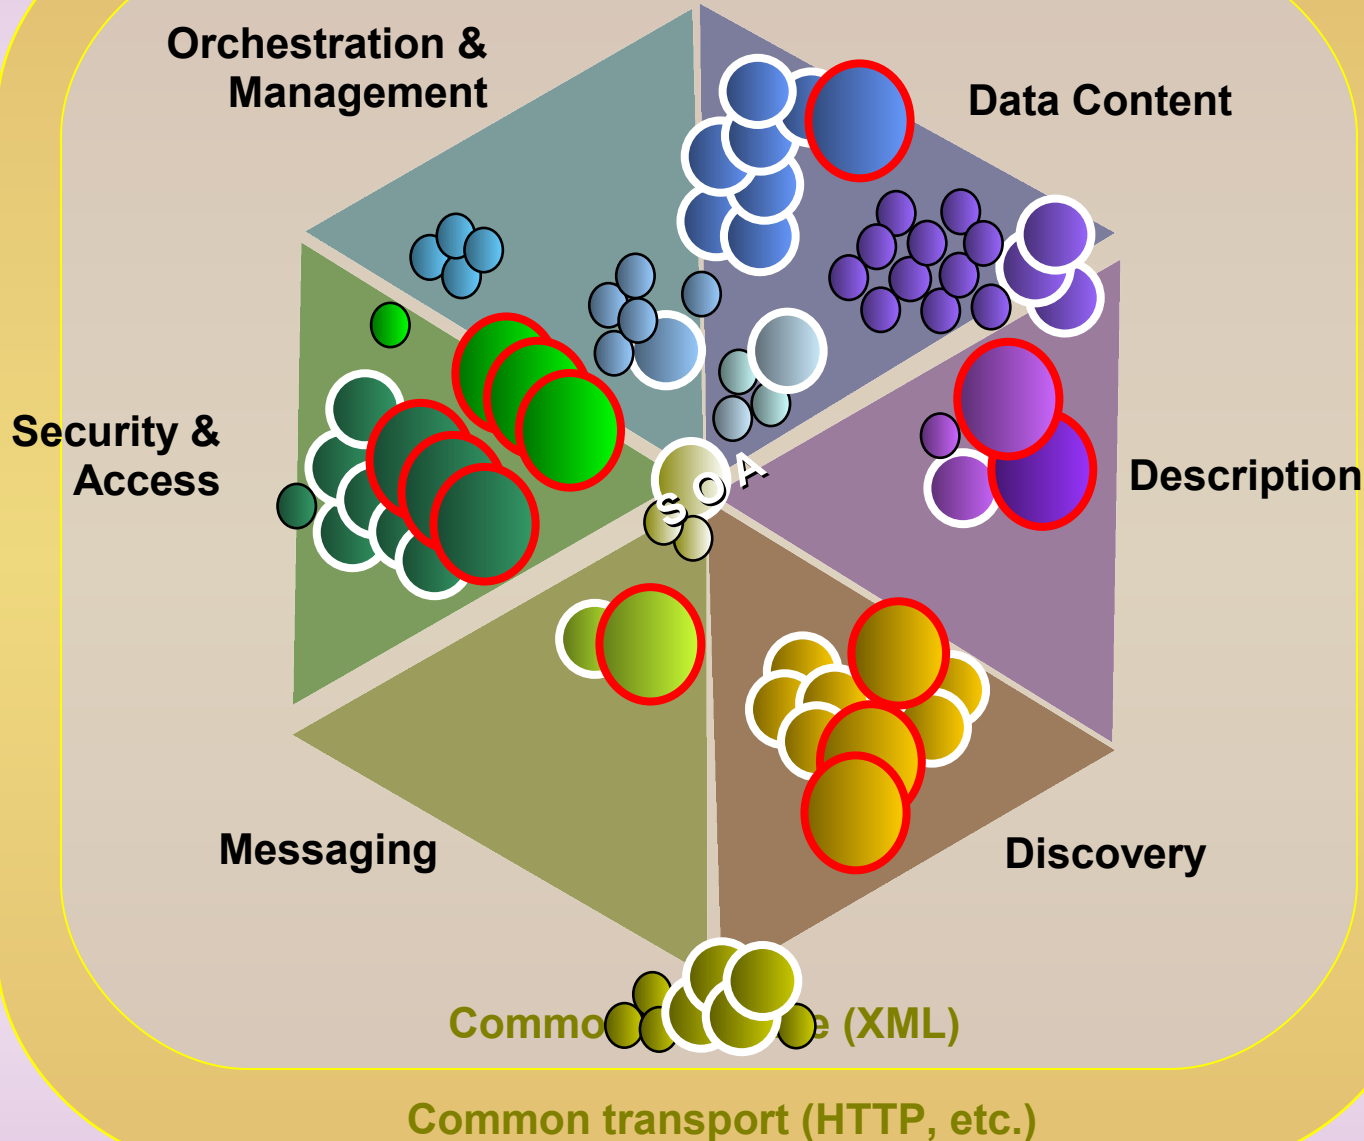

"The largest standards group for electronic commerce on the Web"

# Developing standards for XML and SOA

## 2004

**All work is  
visible at  
[www.  
oasis-open.  
org](http://www.oasis-open.org)**

***Member sections:  
functional &  
stakeholder  
groups***

# OASIS interoperates with the world

- Generally, around 45% of our 5000-6000 *individual participants* (“users”) are outside North America
- About 35% of our 300-400 *organizational* members are outside North America
- Approximately half of our technical committees are led by chairs and editors outside the U.S.
  - Without Germany, probably no BPEL
  - Without China, probably no UOML
  - Without Japan, probably no RELAX NG
  - No OpenDocument or UBL without diverse leadership
  - Without UK, probably no Election ML
  - Semantic SOA work centered in Austria & Turkey
  - Web Services QA work from Korea
  - Etc., etc., etc.

## **How can standards organizations be globally accessible and interoperable?**

- **Careful choices, in face-to-face meetings and teleconference arrangements**
- **Sensitivity to broad stakeholders: defeat the small-club-of-editors mentality**
- **Technology for access to decisions: web based ballots, wikis, IRC, VoIP, etc.**
- **Speed, and rules, that genuinely permit all voices to speak, e.g. appropriate consensus, ballot and review periods (see WTO guidance)**
- **The style, diversity and neutrality of leadership also matter: setting a tone of inclusiveness & consultation**

# **OASIS interoperates with the world:**

- **Cooperation, liaison and harmonization with other standards organizations is a first-class OASIS priority**
  - Working to reduce duplication, promote interoperability
  - Gaining sanction/authority & adoption for OASIS Standards
- **Collaborative working relationships with:**
  - ISO, IEC, ITU, UN-ECE MoU for E-Business
  - ISO/IEC JTC1 SC34, ISO TCs (Cat. A Liaison)
  - ITU-T A.4 and A.5 Recognition
  - IPTC, LISA, SWIFT, UPU, OECD, World Bank
  - ABA, ACORD, AIAG, ANSI-HITSP, CEN/ISSS, Changfeng, CESI, CNNIC, EA-ECA, EEMA, HL7, HR-XML, European ICTSB, INCITS, KIEC, LRC, MBAA, NASPO, PISCES
  - CommerceNet, IDEAlliance, OAGi, OMA, OMG, Open Geospatial, Open Group, RosettaNet/UCC, TMForum, W3C, WfMC, WSCC, WS-I

# **OASIS interoperates with the world:** **sharing successes**

- **ebXML > ISO = ISO TS 15000**
- **OpenDocument > JTC1 = ISO/IEC IS 26300**
- **SAML > ITU-T = ITU Rec. X.1141**
- **XACML > ITU-T = ITU Rec. X.1142**
- **WebCGM > W3C = Final Recommendation**
- **UBL > UN/CEFACT = in process**
- **CAP > ITU-T = ITU Rec. X.1303**
- **More JTC1 submissions in process**

## OASIS interoperates with the world: sharing successes

- OpenDocument > JTC1 = ISO/IEC IS 26300
- Unanimous JTC1 ballot yielded optional suggestions, so OASIS TC reworked the spec and submitted “version 1.0 2nd ed.”

# Technical trends in OASIS work

- Infrastructure work is maturing
- The action is moving up the "stack" to rules, content and semantics
- Stronger emphasis on service orientation: interoperability and modularity
- End users and verticals -- the use case owners -- are more powerful and more involved: conformance essential

[www.oasis-open.org](http://www.oasis-open.org)

# Technical trends in OASIS work

- **Maturing standards require detailed maintenance methods**
- **OASIS “Approved Errata” rules define official updates with public review**
- **More cooperation requires more stakeholder feedback and collaboration**
- **OASIS leads in negotiating continuing bilateral collaboration with other SDOs**

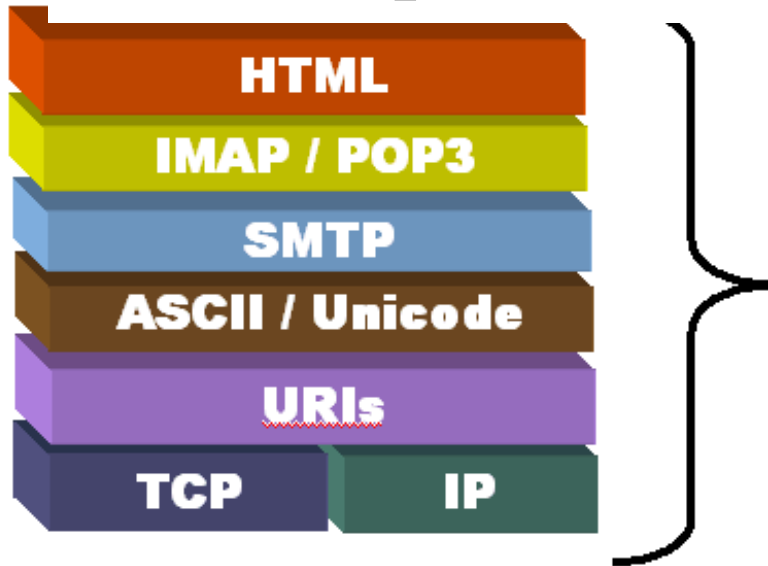

[www.oasis-open.org](http://www.oasis-open.org)

# Business trends in OASIS work

- More emphasis on the context of other specifications, other organizations: **What does your standard work with? (Implementing in a mash-up world)**
- More need for licensing clarity: **Who must give me permission? What other standards are involved?**
- More quality assurance: **Test assertions, conformance clauses and explicit use cases**

# Interoperability requires flexibility

**You are going to plug lots of pieces  
together. Modularity good.  
Conformance good. Alternatives good.  
Exclusive dependencies bad.**

# **Liaison Report to JTC1 from OASIS**

**Interoperability is essential ...  
even for Standards Organizations**

**James Bryce Clark**  
**Director, Standards**  
**Development, OASIS**
