**Draft Agenda for the
ISO/IEC JTC 1/SC 6/WG 9 and ITU-T SG17/Q.12
collaborative meeting in London
27 September – 1 October 2010, 2010**

The topics for the Agenda are expected to include (not necessarily in priority order) to be:

- a) Review progress of ISO/IEC 29168-1.
- b) Review progress of ISO/IEC 29168-2.
- c) Receive and progress as appropriate a report from the Expert Group for the appointment of the ORS Operational Agency, and consider an SC 6 Resolution for a recommendation to JTC 1 for appointment of the Registration Authority.
- f) Wrap-up PER EIs. We want to agree what to do to wrap-up, and to get SC 6 approval (with SG 17 approval to follow in September). We also need to sort out all other SG 17 Web-pages related to ASN.1.
- g) Allocate OID arcs, Unicode labels, and long arcs as resolved by SG 17 in TD 1025.
- h) Allocate OID arcs and Unicode labels for {joint-iso-itu-t (2) example (999)}, with Unicode labels for Example in the official ITU-T languages: French, Russian, Arabic, Chinese and Spanish.
- i) We have Defect Reports, but the major one is Defects on X.660 (and X.680?) etc to support case-folding and normalization of Unicode labels (see also collected e-mails from Geneva.
- j) Progress (if necessary) any work on the internet draft of the 'oid' URI/IRI scheme.

A detailed timetable and agenda will (as usual) be issued nearer the time.

The logistic information is in 6N14253 and 6N14254. For members of SG17 Q.12 wishing to attend, see TD 0950.
