<p>France disagrees on the creation of a Joint Working Group led by ISO/TC 130 for the development of ISO 14298. The reason is that this specific standard is oriented to a very specific industry. So the needed expertises are not the same.</p> <p>Furthermore ISO/TC 247 goal is to draft a generic standard which shall refer to the existing ones.</p> <p>France could decide to join the JWG if it was created. Currently, experts from ISO/TC 130 P-members may already join the TC 130/WG 10 which began to work on ISO 14298.</p>

<p>"The members of the Dutch mirror committee approve the creation of the Joint Working Group between ISO/TC247 and ISO/TC130 on condition that ISO/TC247 accommodates ISO/TC130 WG10. The reason for this is that the scope of ISO/TC247 is closer to the objectives of WG10 than the scope of ISO/TC130. For example, within ISO/TC247 there is important safety expertise and more knowledge on securing the chain. Therefore it would be more logic that WG10 is accommodated by ISO/TC247."</p>
