As per the SC 6 Geneva resolution 6.1.2, SC 6 would like to request JTC 1 for stabilization of ISO/IEC 8802-2.

Resolution 6.1.2 Proposal for stabilization of ISO/IEC 8802-2

SC 6 approves the stabilization of the following standard:

Project #	Designation	Year	Abbreviated title
05.02.00	8802-2	1998	Specific LANS. Logical Link Control

Rationale: It is important that SC 6 is seen to be maintaining its ISO/IEC 8802 standards in alignment with IEEE 802. The equivalent IEEE 802.2-1998 standard has been archived by IEEE and stabilization of the ISO/IEC standard will maintain alignment. This standard has not been changed or amended in the past five years and, insofar as can be determined, will not require further maintenance of any kind.
