Subject: February 18th due date for comments - JTC1 WG1 Project 5 TAG Comment on 6N13774 and 6N13775

Although ANSI is aware you might not be able to include our late vote in the summary of voting, we still wanted you to be aware of the US position.

"The U.S. opposes progressing docs 6N13774- 6N13775 in that there is a currently satisfactory solution broadly accepted in the global market and sees no reason to promote a new standard to split the market into incompatible systems."

Thanks in advance for considering this comment

Best,

Tony Zertuche
