6N4099 - SC 6 WG 9 Recommendations from the Geneva 16-25 Sept 2009 meeting with SC 6 Meeting Report attached.

Recommendation 1

The SC6 Secretariat is requested to post 6N4099 (this document) for National Body information, and to process the following Recommendations.

Recommendation 2

The SC6 Secretariat is requested to post 6N14097 (Agenda and minutes of Joint Meeting of Q.12/17 and SC 6 WG 9 in Geneva 16-25 Sept 2009) for National Body information.

Recommendation 3

The SC6 Secretariat is requested to post 6N14087 (Approved DoC on CD1 of ISO/IEC 29168) for National Body information.

Recommendation 4

The SC6 Secretariat is requested, in accordance with Tokyo SC6 Resolution 6.9.4, to post 6N14098 for immediate second CD ballot when received from the Project Editor (expected to be by 12 October). WG9 requests that the ballot close on 10 Jan 2010 in time for a Ballot Resolution Meeting in Barcelona Jan 18-22 2010.

Recommendation 5

The SC6 Secretariat is requested to forward 6N4101 (Liaison to SG 16) together with the second CD text of the ORS (6N14098) when this later is received from the Project Editor. The liaison should be posted for NB information once it is sent.

Attachment 1: SC 6 Meeting Report from the Convenor

A.1 The was a very busy meeting, involving an early start and a late finish on most days, including working on the middle Sunday. The agenda and minutes are in 6N14097.

A.2 There were 18 attendees for various parts of the joint meeting (UK-2, US-1, FR-2, KR-3, CN-2, US-2, RU-1, DE-2, others-3, with a further 17 attending the ad hoc on the positioning of .oid. See 6N14097 for details.

A.3 There was an Ad Hoc meeting at lunch-time, heavily attended, to discuss the positioning of '.oid' with the DNS. This was only partially resolved. ".oid.arpa" is abandoned. ".oid-res.org" is favoured, with some opposition. KISA (Korean Internet and Security Agency) were asked to acquire it for our use.

A.4 There is an outstanding proposal to use the ITU-T TAP (rather than AAP) proposals for approval of the ORS. This has not been decided yet, but if it happens, it will slow down the work significantly. SC 6 will need to consider at its Barcelona meeting a Resolution to change the limit dates on this project.

A.5 The major achievement was the resolution of all comments on the first CD ballot of the ORS, agreement by China and the UK that their votes of DISAPPROVE had changed to APPROVE, and agreement on a second CD ballot to be completed in time for a BRM in Barcelona. A number of other technical issues on the use of DNSSEC and on case-folding and punycode encodings were also partially resolved, and will produce significantly better text in the second CD (due to be posted 12 October 2009, ballot closing 10 Jan 2010).

A.6 Some work (but not enough) was done on PER Encoding Instructions. A new rev of the Internet Draft for the 'oid:' IRI scheme was posted, and is under review.

A.7 New OID arcs were allocated, and will need ratification by SC 6 in Barcelona (see TD 0612, sent as a Liaison to SC 6).

A.8 A further liaison was sent to TC215 regarding collaborative work on an export format for the OID Repository. There has still been no response from TC215.

A.9 A number of other liaison's were sent, listed in the Agenda and Minutes.

A.10 As usual, regular (usually weekly) electronic meetings will be held using Skype and GotoMeeting to progress the work between now and Barcelona.
