ISO/IEC JTC 1 SWG-ARM MEETING GENEVA, WEDNESDAY 27th to FRIDAY 29th MAY 2009

Meeting Report

The group met at ISO CO to receive presentations from ISO and IEC on the systems for document preparation, distribution and archiving and the collaborative tools provided by the central offices.

The group addressed all agenda items with the exception of two, a review of archiving standards, and a full consideration of the liaison received from JTC1 SC29 on the Professional Archival Application Format. To establish the relevance of this technology for archiving of JTC1 material the SWG-ARM would first like to receive additional survey responses from the SCs so that all the input can be collated.

The meeting produced text for the proposed EDPDA (Electronic Document Preparation, Distribution and Archiving) standing document.
