**TITLE**

French position regarding the results of the two ISO/IEC DIS 13157 and 13158 and their follow up

France would like to highlight that

- five negatives votes have been made by members considered as important countries that are one of the greater implementors of the NFC technology and applications
- comments should be considered as major and fundamental ones
- there are ongoing work regarding the contactless&NFC harmonisation (reminder see below the resolution N° 42 from JTC1 in Nara)

So France asks to postpone the NFC sec developpement (ISO/IEC 13157 and 13158) until the NFC study Group has given its results, recommendations to SC6/WG 1 for the harmonisation.

**Resolution 42 - Harmonisation of ISO/IEC 14443 standard with standards on Near Field Communications (NFC)**

JTC1 recognises the establishment of a study group in SC 6 to address the harmonisation of the NFC standards and ISO/IEC 14443 with SC 17's collaboration through their on-going liaison relationship.

JTC 1 encourages SC 6 and SC 17 to continue this harmonisation effort between the ISO/IEC 14443 series of standards from SC 17 and the NFC standards from SC 6.

JTC 1 encourages SC 6 and SC 17 to first draw-up and agree on a list of technical points to address in order to perform this harmonisation.

Ecma International as the originator of the NFC standards is invited to be actively involved in this effort.

SC 6 and SC 17 are requested to report on the aforementioned joint harmonization effort at the next JTC 1 plenary in 2009.
