Title: Liaison Statement from JTC1 SC6 to IEEE 802.11 in Response to their Liaison Statement found in 6N14152
Date: 19 January 2010
Source: SC6 WG1

SC6 appreciates the liaison statement from the IEEE 802.11 Working Group contained in 6N14152, its information content and the invitation for further cooperation. SC6 wishes to continue and deepen this cooperative relationship with the IEEE 802.11 in the future, particularly regarding future versions and extensions of ISO/IEC 8802-11, by whichever party they be produced.

SC6 is appreciative of the additional ways that are outlined in 6N14152 to review proposed IEEE standards earlier in the IEEE development process and for National Bodies and their representatives to participate in IEEE Sponsor Ballots. Further SC6 would welcome the opportunity to receive as a matter of course new draft text at the start of every Sponsor Ballot or Sponsor Ballot recirculation of developing IEEE 802.11 work for circulation to its National Bodies. By this means SC6 National Bodies will have the opportunity to provide review and comment through liaison back to IEEE 802.11.

As a consequence, SC6 is positive that the two organizations will continue their partnership and resolve whatever issues arise in a pragmatic and constructive manner.
