### **Swiss Comment on 6N14032**

The Swiss NB is dissatisfied by the current text of the PSDO agreement. The Swiss NB proposes that

- In the interest of harmony and practicality, IEEE standards which are fast-tracked to ISO shall be balloted as DIS ballots, rather than as FDIS ballots,
- The copyright situation shall be clarified so that text from IEEE/ISO standards can be used in later ISO standards, just like text from all other ISO standards can freely be reused in the development of further ISO standards,
- The ISO patent policy shall be applied for all fast-tracked IEEE standards (the current text doesn't treat this important aspect),
- Adoption of ISO standards by IEEE shall be agreed between ISO and IEEE (the current text foresees that this shall happen between ANSI and IEEE),
- Contradictions with the ISO/IEC Directives and the JTC1 Supplement shall be removed,
- Before adoption by ISO, the revised final PSDO agreement shall be presented to the JTC1 members for review and comment.
