New Work Item Proposal

8 May 2009

PROPOSAL FOR A NEW WORK ITEM

Date of presentation of proposal: 2008-06-26	Proposer: ISO/IEC JTC 1/SC 24
Secretariat: BSI	ISO/IEC JTC 1 N XXXX ISO/IEC JTC 1/SC 24 N 3114 ISO/IEC JTC 1/SC 24/W 8 N 0494

A proposal for a new work item shall be submitted to the secretariat of ISO/IEC JTC 1/SC 24, with a copy to the ISO Central Secretariat.

Presentation of the proposal - to be completed by the proposer.

Title Amendment to ISO/IEC 18023-3:2006(E) — SEDRIS — Part 3: Transmittal format (STF)
Scope The primary new work to be addressed is an amendment to <i>ISO/IEC 18023-3(E) – Part 3: SEDRIS transmittal format (STF)</i> . The work to amend ISO/IEC 18023-3 includes the following: 1) Changes to Part 3 that correspond to changes proposed for Part 1 that affect Part 3. 2) Correction of errors too minor to require a corrigendum. 3) Other improvements to the above standard that may be identified by JTC1/SC24/WG8 during the development of this work item. It is intended to publish this amendment in the form of a new edition.

Purpose and justification

1) Changes to Part 3 that correspond to changes proposed for Part 1 that affect Part 3.

Since publication, use of ISO/IEC 18023-1:2006 has identified several inconsistencies between various clauses of ISO/IEC 18023-1, or with corresponding companion standards. Some of these changes affect the content of Part 3.

2) Correction of errors too minor to require a corrigendum:

Since publication, use of ISO/IEC 18023-3 has identified several typographical and/or editorial errors in the text. While too unimportant to justify a corrigendum, they have been collected and will be applied as part of this amendment.

3) Other improvements to the above standards that may be identified by JTC1/SC24/WG8 during the development of this work item. :

As the amendments to ISO/IEC 18023-3 and its related standards are processed, it is possible that additional inconsistencies and/or errors will be identified. Any such should be corrected so that the standard is of the highest quality possible. No new functionality is expected to be added.
