Contribution from the Dutch National Committee to the Study Group on Harmonization on September 17-18 in Singapore

The Dutch National Committee welcomes Resolution 6.1.3 of the SC6 meeting on June 1-5 in Tokyo, and is convinced that this will contribute substantially to sustained consistency and harmonization of NFC standards.

We propose to implement the statement "use references rather than copying text, wherever possible" as follows:

- Clauses in the next edition of ISO/IEC 18092 on the air interface (modulation types and bit coding) shall be replaced by a normative reference to the respective clauses of ISO/IEC 14443 (for type A as well as type B). Care should be given to not bind to a specific edition of this normative reference.
- If requirements of ISO/IEC 18092 are not specified in 14443, but only in national standards, then informative references to such national standards shall be used in ISO/IEC 18092.

An example is the air interface for the bit rate of 212kbps in ISO-IEC 18092 and parts of the command set defined in JIS X 6319-4, which expands to ISO/IEC 18092.

Duly signed by:

Ton van Bergeijk,

Standardization consultant
