No. of Pages:	2

1st Working Draft of ISO/IEC 20005, Information technology — Sensor Networks — Services and Interfaces Supporting Collaborative Information Processing in Intelligent Sensor Networks

Date: November 15, 2010 | Document: **WGSN-N087**

1	2	(3)	4	5	(6)	(7)
MB[1]	**Clause No./ Subclause No./ Annex** (e.g. 3.1)	**Paragraph/ Figure/Table/ Note** (e.g. Table 1)	**Type of com-ment[2]**	**Comment (justification for change) by the MB**	**Proposed change by the MB**	**Secretariat observations** on each comment submitted
CA			ge	It is understood that that this is an early version of this document and thus at this point we only have a general comment as follows:		
CA	5.1		ge	Figure 1 presents a "functional architecture of sensor networks" which differs from those provided in the early drafts of WD29182 (-1, -6 and -7). A reference to WD29182 and how these architectures will relate to each other would be helpful. It is understood that alignment with the "viewpoints" to be provided in WD29182 (Part 3?) will be helpful. It would be helpful to discuss the origin of the "Service Layer" shown in Figure 1, since this is being added to the classic OSI model (ISO/IEC 7498).	Co-ordination with WD29182 is required.	

1   **MB** = Member body (enter the ISO 3166 two-letter country code, e.g. CN for China; comments from the ISO/CS editing unit are identified by ******)

2   **Type of comment:**   **ge** = general   **te** = technical   **ed** = editorial

NOTE   Columns 1, 2, 4, 5 are compulsory.
