Recommendation for stabilization of ISO/IEC 7064:2006 (1st edition), Information technology – Security techniques -- Check character systems

A call for contributions (SC 27 N7368) was issued by the SC 27 Secretariat to the National Bodies for the periodic pre-review of ISO/IEC 7064: 2003, Information technology — Security techniques — Check character systems.

SC 27/WG 2, in its meeting held in Beijing, China, during 2009-05-04/08, considered the results with comments received (as documented in SC 27 N7516), and unanimously agreed that this standard should be stabilized.

Therefore, SC 27/WG 2 makes the following recommendation:

● Stabilize the ISO/IEC 7064: 2003-02-15 — Information technology — Security techniques — Check character systems

● Rationale:
   This standard is being used in the following applications:
     -IBAN: International Bank Account Number (ISO 13616-1/2);
     -ISAN: International Standard Audiovisual Number (ISO 15706-1/2);
     -Livestock Identification (USA).
   This standard has not been changed for long time for its basic architecture.
   This standard has little chance to revise.
