**Recommendation for Withdrawal of
ISO/IEC 13335-1, Management of information and communications technology
security – Part 1: Concepts and models for information and communications
technology security management**

A call for contributions was issued by the SC 27 Secretariat to the National Bodies to the periodic pre-review of ISO/IEC 13335-1:2004, Information technology – Security techniques – Management of information and communications technology security – Part 1: Concepts and models for information and communications technology security management

SC 27/WG 1, in its meeting held in Kyoto, Japan, April 14-18, 2008 considered the results with comments received (as documented in SC 27 N7490), and unanimously agreed that the standard should be withdrawn as the material contained in this standard is now addressed by ISO/IEC 27005:2007.

Therefore SC 27/WG 1 makes the following recommendation.

· WITHDRAWAL of ISO/IEC 13335-1:2004 (1st edition)

Information technology — Security techniques — Management of information and communications technology security – Part 1: Concepts and models for information and communications technology security management
