TITLE

French position on SC 6N13791

COMMENT

the status of ISO/IEC JTC1/SC6 about the initial scope and issue list contained in TR.FNPSR, Future Network: Problem statements and Requirements.

As indicated in Document 6N13855 (Focus Group on Future Networks; Terms of Reference), ITU-T SG13 has agreed to create a Focus Group on Future Networks during their January 2009 meeting.

ITU-T SG13 proposes that the new Focus Group be used as a vehicle to share the discussion on Future Networks and ensure global common understanding about Future Networks with collaboration and harmonization with relevant entities and activities.

ITU-T SG13 wishes to have close collaboration with ISO/IEC JTC 1/SC6 WG7 on relevant work on Future Network through the proposed Focus Group.

France believes that every effort should be made to avoid duplication of work.

Based upon the long standing successful collaboration between ISO/IEC JTC 1 and ITU-T (e.g. common text for IS ISO/IEC 9594-1 and Rec. X.500), France suggests that ISO/IEC JTC 1/SC6 and ITU-T establish a common agreed vision and analysis regarding "Future Network" standardization, develop an harmonized view of the work items to be studied on Future Networks with the aim to create and publish common text following the collaboration guidelines available in Annex A of ITU-T Recommendation A.23 and Annex K of the ISO/IEC JTC 1 Directives.

ACTION

For SC 6 consideration
